FRESH VEGETABLE MANURE.

When we cultivated a garden some years ago, we put in practice continually, in the summer, a plan of enriching the soil of our kitchen garden without the aid at that time of animal manure, or the offal of our stables and barn-yard. The cabbages, potatoes, peas, beans, &c., were planted in our garden, as in most others, ground in front of our dwelling, we pressions is even nobler. opened a trench between these drills as 1 the earth which had been temporarily re- we may deduce how supremely blessed it move I was again thrown upon them, and was,

But it was not the grass only that was the pea and bean halm, the outer cabbage the pea and the cabbage stalks, in short the leaves and the cabbage stalks, in short the cabbage stalks are cabbage stalks.

were dressed for the winter. The earth, of manure was then spread upon the whole bed-some years we used stable again. The weeds by this process were entirely destroyed-their tops to prevent time-the bed was enriched, and the plants preserved from the effects of the cold and the frost.

by, of which there was, of course, at in the earth, they are observed to require frequently a change of ground, that is to be removed to a soil where the vegetable manure has not yet been removed. This is the reason why the virgin soil of new clearing is so excellent for them.

We will touch but briefly upon the ad-

vantages to be derived from this system. Mold composed of vegetable substances which have rotted and fermented in a heap, till their texture has been broked down, and the greater part of their juices evaporated, is unquestionably of great value, (as for instance, clover and other green crops plowed under) and admirably calculated to impart vigor and strength to the growth of plants. But the vegetable refuse of a garden requires a length of time before it can be brought into this the heaps; and in whatever part of the garden, or grounds, they are placed, they have always an unsightly and slovenly appearance. Add to this that these heaps lose nine parts out of ten, not only of their size and substance, but also of their most valuable qualities, by the continual action of the sun and air and rain upon them. But if the vegetable refuse of the garden is buried beneath the surit is then easy of solution. The moisture of the earth assists the fermentation and decomposition, and the juices being preserved in the soil, become the nutriment and support of succeeding crops.

When a garden is manured in this way it is scarcely possible to exhaust the soil. that will stand the severity of some frosts. vegetable refuse to keep the soil in con- upon his own Sabbath! Our spirits flock stant good condition. To the market gardeners such a method of cultivation must be of incalculable benefit. It will, at any rate, pay well the owners of the land, or those who have leases.

We will only mention one more advan- Cotton Seed Menl and Cotton Seed. tage attending this system which will Chemical analysis shows that cotton delight in gardens and own country seats available for farm stock, while its price is has and can do on one acre of land: or villas—we mean its external neatness. relatively lower than that of any other.— When the gardener depends chiefly upon After considerable experience in its use vegetable matter for the support and improvement of his soil, every weed will be are prepared to say that its effect in feed-manue, seventy-five to the indications. speedily buried in his trenches before it ing seems fully to sustain the indications goes to seed, and every decayed leaf or of the analysis. ONE KISS BEFORE WE PART.

One kiss before we part! One kiss before we part!

But one for love's sweet sake
To sweeten, for my heart,
The pain of this mistake.
Your hand is in my own,
But your head is turned away;
For the first time and the last, One little kiss, I pray!

Nay; though you love me not, And stab me, saying "Friend;" Nay; though I be forgot Before a fortnight's end— Still let me kiss the lips
That traitors are to love—
What! nothing but your hand!
And that within its glove?

Because the past was sweet; Because you are so dear; Because no more we meet In any future year— Be kind, and make me glad, Just for a moment's space-Think! I shall be so sad, And never see your face!

One kiss before we part! And so you nothing meant?
Though I be gone, you heart
Will keep its cold content, Nay; not your cheek—your lips— I claim them as my right— Small guerdon for great love-Before we say good night.

Ah! shy unlooking eyes!
Not true—though blue and rare—How dare you feign surprise
To know I hold you dear? What coyness will not yield, Yet boldness, sure, may take— Well, then, if not for Love's, One kiss for Friendship's sake:

One kiss before we part! One little kiss, my dear! One kiss—to help my heart
Its utter loss to bear.
One kiss—to check the tears,
My manhood scarce can stay; Or thus-I make it "Yes!" While you are saying "Nay!"

-DR. WILHOFT'S

Anti-Periodic, or Fever and Ague Tonic. Will invariably cure all MIASMATIC FEVERS, VIZ: CRILLS AND FEVER OR FEVER AND OR PERMICIO'S FEVER, AND BILIOUS RE-

It is also the best remedy for the cure of Enlarged Spleen, (Fever Cake) General Debility and Periodic Nearalgia.

Dr. Wilhoft's ANTI-Prinodic, unlike most other remedies ANTI-Prinodic, unlike most other remedies of its kind, pretends to cure but one class of diseases, namely, those caused by malarial poisoning of the blood. Chilis and Fever, Dumb Chilis, Congestive Chills, Billious Fever, etc., all depend upon malaria, and the Anti-Periodic of Dr. Wilhoft we consider, beyond a doubt, a certain Specific against it because never fail to ef-

fect a permanent cure. Even in those obstinate cases, in which Quinine, Arsenic or Prussiate of Iron had been used in vain, this remedy effected a cure in two or three days, without a relapse

ever occurring.

The advantage that the Anti-Periodic possesses above all other remedies of this class, consist in the fact, First, That it agardably breaks up the feer together with its iability to return on the 7th, 14th, and 21st days. Second, That it does not occasion any head symptoms, like those produced by Quinine. Third, That it can be administered to children of the most tender age, with impunity. And, Fourth, That it contains no Quinine, Arsenic or other mineral or vegetable poisons whatever.

OR MEDICINE, for Dyspepsia, Headache, Jaundice, Costiveness, Camp Dysentery, Sick Headache, Chronic Diarrheen, Affections Circuit Court of Hinds county, 1st District. of the Bladder and Kidneys, Fever, Nervous-

as in many cases the patient is not within the reach of a physician, it requires that some reach of a physician, it requires that some remedy should be provided that would not in lands, lying and being in the county and doubt, which the testimony of bundreds will east half of south-east quarter and south half of west half of south-east quarter of

SYMPTOMS OF A DISEASED

onin is felt under the shoulder Rheumatism in the arm. The stomach is affected with loss of costive, sometimes alternating with isx the head is troubled with pain, accompanied with a dull, heavy sensation. There is generally a considerable loss of memory, accompanied with a painful sensation of having left undone something which ought to have been done. A slight, dry cough is sometimes an attendant. The patient complains of weariness and debility; he is easily startled, his feet are cold or urning, and he complains of a prickly sensation of the skin; his spirits are low; and al-though satisfied that exercise would be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusis every remedy. Several of the above symptoms attend the disease, but cases have occurred when few of them existed, yet examination of the body after death has shown the Liver to have been extensively deranged.

It should be used by all persons, old and young, whenever any of the foregoing symptoms appear. It is a purely vegetable compound, is not injurious to the most delicate constitutions, and will keep the liver in a healthy action if used properly.

Persons living in unhealthy localities may avoid all bilious attacks by taking a dose oc-casionally to keep the liver in healthy action.

Many persons, from esting too much, are restless at night, or in day time are fidgety, wool-gathering, can't understand what they read, can't keep their thoughts on any one sub-ject so as to reason well, or become freeful.-One or two table-spoonsful will give relief.

JAUNDICE.-Take enough Regulator after eating each meal to produce one full action from the bowels every day.

Pregnant ladies will find sure relief from their headache, costiveness, swimming in the head, colic, sour stomach, restlessness, etc. Prepared only by

> Ayer's Sarsaparilla A compound remedy, designed to be the most

effectual Alterative that can be made. It is a concentrated extract of Para Sarsaparilla, so combined with other substances of still greater alterative power as to afford an effec-tive antidote for the diseases Sarsaparilla is reputed to cure. It is believed that such a remedy is wanted by those who suffer from Strumous complaints, and that one which will accomplish their cure must prove of immense service to this large class of our afflicted fellow-eitzens. How completely this compound will do it has been proven by experiment on many of the worst cases to be found of the following complaints: -

SCROPULA AND SCROPULOUS COMPLAINTS, ERUPTIONS AND ERUPTIVE DISEASES, ULCERS, PIMPLES, BLOTCHES, TOMORS, SALT RHECM, SCALD HEAD, SYPRIES AND SYPRILITIC AV-FECTIONS, MERCURIAL DISEASE, DROPSY, NEC-BALGIA OR TIC DOULOUREUN, DEBILITY, DYS- CAPITAL, PEPSIA AND INDIGESTION, ERYSTPELAS, ROSE on Sr. Anthony's Frue, and indeed the whole class of complaints arising from IMPURITY OF тик Вьоов.

This compound will be found a great promoter of health, when taken in the spring, to expel the foul humors which fester in the blood at that season of the year. By the time ly expulsion of them many rankling disorders are nipped in the bud. Multitudes can, by the aid of this remedy, spare themselves from the endurance of foul eruptions and ulcerous sores, through which the system will strive to rid itself of corruptions, if not assisted to do this through the natural channels of the body by an alterative medicine. Cleanse out the vitiated blood whenever you find its impurities bursting through the skin in pimples, eruption or sores; cleanse it when you find it is obstructed and sluggish in the veins; cleanse it whenever it is foul, and your feelings will tell you when. Even where no particular disorder is felt, people enjoy better health, and live longer, for cleaning the blood. Keep the blood healthy, and all is well; but with this pabulum of life disordered, there can be no lasting health. Sooner or later something must go wrong, and the great machinery of life is disordered or overthrown, Sarsaparilla has, and deserves much, the

reputation of accomplishing these ends. But the world has been egregiously deceived by preparations of it, partly because the drug ne has not all the virtue that is claimed for it, but more because many preparations pretending to be concentrated extracts of it, contain but little of the virtue of Sarsaparilla, or any thing else. During late years the public have been mis-led by large bottles, pretending to give a quart of Extract of Sarsaparilla for one dollar. Most of these have been frauds upon the sick, for they not only contain little, if any, Sarsapa- from the Chills would rilla, but often no curative properties whatev-er. Hence, bitter and painful disappointment has followed the use of the various extracts of Saranparilla which flood the market, until the name itself is justly despised, and his become synonymous with imposition and cheat. Still we call this compound Sarsaparilla, and intend to supply such a remedy as shall rescue the spon it. And we think we have ground for believing it has virtues which are irresistible by the ordinary run of the diseases it is intend-

eradication from the system, the remedy should be judiciously taken according to directions on DR. J. C. AVER & CO. Price, \$1 per Bottle; Six Bottles for \$5. Ayer's Cherry Pectoral has won for itself such a renown for the cure of every variety of Throat and Lung Complaint, that it is entirely unnecessary for us to recount the evidence of its virtues, wherever it has been employed. As it has long been in constant use throughout this section, we need not do more than assure the people its quality is kept up to the best it ever has been, and that it may be relied on to do for their relief all it has ever been found to do.
